Software Engineering		Public Relations		MEd
		Sociology		MS Physician Assistant Studies
				Spanish
				Sport Management
				MS Sport Management** (new 2013-2014)

In the second iteration of the 5 year cycle, all focus groups will work on the assessment of program student learning outcomes. The groups will include all full-time faculty teaching in the program. At the close of the academic year, the groups will have met for three times for 1-2 hour work sessions. End products include completion of the annual program assessment survey (PAS), completion of a five year assessment plan, and creation of a poster or other documentation in order to share results with the incoming groups for the next academic year. Documentation by focus groups also will be used to provide evidence to accrediting bodies of effective program assessment.

** *Newly introduced programs. Aligned with similar academic program or division.*
